a helpful guide to our product offerings.

Dentistry Open Wide™

So What's the Story Behind PENTRON Strada™?

As a manufacturer of dental products, PENTRON has a long-standing reputation for delivering recognizable quality and value in all they do. Like the dental professionals they serve, PENTRON understands that it takes more than just great tools to achieve optimal dental health. So, to demonstrate this belief and remain true to their heritage, PENTRON wanted to create deeper, more comprehensive relationships with the dental professionals they serve; a relationship built less on the extensive PENTRON product line and more on creating solutions that can help dentists build successful practices.

The name for this ambitious new venture is PENTRON Strada, which was derived from the concept of "a new path, road, or means to a new relationship" between manufacturer, customers, and end-users. It lives as an online platform at PentronStrada.com, where it can create meaningful dialogue between dental professionals and PENTRON, fill information gaps within the practice, and provide problem-solving strategies. Databases within PentronStrada.com are fed by incoming news feeds and user interaction, and can grow in depth and breadth as time goes on. In other words, the more the site is used, the more it can offer its users.

As always, PENTRON continues to sell dental restorative materials through the parent site: Pentron.com. Meanwhile, PentronStrada.com rounds out the story-positively impacting dental practices with information and tools that have nothing to do with the PENTRON product line. PentronStrada.com is proof that dental professionals can always get something valuable from PENTRON—even without making a purchase.

Fusio™ Self-Adhesive Flowable Composite

Fusio Self-Adhesive Flowable Composite represents the natural progression of composite resin technology that clinicians have been waiting for. Fusio combines the benefits of adhesive and restorative technology into one product bringing restorative techniques to new unprecedented heights. Simply syringe into the preparation, agitate, and light-cure. Immediately upon application Fusio conditions, bonds, and seals without the need for an etchant or an adhesive. With such unique applications as dentin replacement and self-adhesive base liner, Fusio will change the way you look at restorative dentistry. Best of all Fusio costs less than premium flowable composites and their required separate adhesives.

Features & Benefits:

- Self-adhesive bonds to dentin and enamel without a separate bonding agent
- Radiopaque easily stands out on an x-ray for quick and easy diagnosis
- Seals dentin offers the potential for reduced sensitivity
- Multiple Indications pit & fissure sealant, block out undercuts, base liner, small Class I, Class III, and Class V

Flow-It[™] ALC Flowable Composite

Flow-It ALC (Accelerated Light Cure) is a versatile flowable composite with flexural and tensile strengths comparable to the best hybrid composites. Excellent handling capabilities and just the right viscosity make it easy to use in an extensive range of applications. Flow-It ALC cures in only 3 seconds with high-speed curing lights and in only 10 seconds with standard halogen curing lights.

Features & Benefits:

- Reliable handling material flows well without slumping to make placement easy
- Versatile effectively used in a wide variety of procedures such as liners for Class II, Class V restorations, repair temporaries, and small Class I & III restorations
- Shade selection complete esthetic selection of 24 shades

Alert[™] Condensαble Composite

Alert Condensable Composite is a posterior restorative material designed to be a viable amalgam alternative. In addition to over 10 years of independently validated* clinical success, what sets *Alert* apart from other composites is its proprietary chopped glass fiber filler that provides amalgam-like handling and exceptional physical properties.

Features & Benefits:

- Efficient low polymerization shrinkage of 1.9%
- Long-lasting minimal wear rate of only 3.5µm per year
- Easy-to-use handles and packs similar to amalgam
- Accommodating available in the 5 most popular posterior shades: A2, A3, A3.5, B1 & C2

Artiste[™] Nano Composite

Artiste Nano Composite is a light cured, radiopaque, nano-engineered restorative material specially formulated to adapt to all anterior and posterior cavity preparations. Easy to handle, Artiste combines esthetics and strength for exceptional polishability and performance – all in one universal composite.

Features and Benefits:

- Ideal handling non-slumping, non-sticky consistency for effortless sculpting and shaping
- Nano-engineered chemistry the perfect combination of esthetics and strength for exceptional
 polishability and performance
- Intuitive shading system follows the Vita® shade guide for easy reference and includes bleach & A opaque shades
- Convenient delivery system choice of single dose or syringe

Simile[™] Universal Composite

Simile Universal Composite combines strength and esthetics for both anterior and posterior restorations. Its nano-hybrid formula has been independently proven* to deliver superior surface smoothness for easy polishability, superior polish retention, exceptional wear resistance, and outstanding physical properties.

Features & Benefits:

- Sculptable handling that will not slump and will not stick to your instrument
- Polishability nano-hybrid fillers produce a simple polish that lasts over time
- Optimum shade selection available in 20 shades to meet all your esthetic needs

FibreKleer[™] 4x Fiber Post

FibreKleer 4x Fiber Posts have outstanding radiopacity of up to 400% of aluminum — to help ensure that they are clearly identified on a radiograph at placement and follow-up appointments. Translucent glass fibers are bundled in a proprietary clear resin matrix to provide reliable flexural strength and help preserve the desired, natural lifelike esthetics. A dentin-like flexural modulus results in a post that flexes with the tooth and transmits stress more evenly along the remaining root structure to help minimize the instance of root fractures, compared to metal posts. For convenience, the Post System Kit packaging features a bur block to securely hold posts and drills while also improving accessibility.

Features and Benefits:

- Radiopacity up to 400% of Al the post is clearly identified on a radiograph
- Multiple sizes and body styles enables you to fit the post to the tooth—not the tooth to the post
- Mimics properties of the root ideal flexural modulus properties help minimize root fractures
- Excellent light translucency glass fibers help to preserve the natural lifelike esthetics

FibreKor[™] Fiber Post

The FibreKor Fiber Post system provides five post sizes to accommodate a range of canal sizes. Designed from uniquely treated glass fibers bundled in a strong resin matrix, the FibreKor Fiber Post system generates an integrated bond among tooth structure, bonding agent, resin cement, and composite core material.

Features & Benefits:

- Effective unique design allows for excellent adherence of resin cement
- Flexible easy shaping and cutting to size for any canal
- Variety three sizes in the kit: *1.00mm, 1.25mm, and 1.50mm diameters with refills available in five sizes

Build-It[™] FR Core Material

Build-It FR Fiber Reinforced Core Material is the perfect material to use with FiberKleer 4x and FiberKor Fiber Posts. Formulated to flow and stack without slumping, the material's unique viscosity enables the clinician to dispense the material and form the core build-up with ease. Specially treated glass fibers provide a minimum compressive strength of 300MPa for a strong and reliable foundation for your indirect restorations. Designed to offer optimal versatility and performance, Build-It FR Core Material self cures in minutes or light cures in seconds to a hard consistency. Choose from shades A2, A3, Opaceous White, Gold, and Blue in either 25ml auto-mix cartridges or 4ml Mini Mix™ syringes.

Features & Benefits

- Easy handling flows and stacks where you want it without slumping
- Versatile designed to offer optimal versatility and performance
- Proven performance strong and reliable foundations are clinically tested
- Award-winning efficient results have won numerous awards

Build-It[™] Light Cure Core Material

Build-It Light Cure Core Material is specifically designed for clinicians who favor the on-command cure afforded by light cure core materials. The high translucency of Build-It Light Cure enables a 10mm depth of cure without the need to build up incremental layers – with as little as 20 seconds of curing time per surface. Furthermore, once Build-It Light Cure is polymerized, it behaves just like original Build-It FR Core Material, with outstanding physical properties and the ability to prep like dentin without ditching. A proprietary BisGMA-free resin promotes non-sticky, sculptable handling that allows for quick and easy adaption to the tooth and post.

Features & Benefits:

- 10mm depth of cure streamlines placement and shortens procedure time
- Easy-to-use handles and packs like a composite with a deeper curing option for core build-ups
- Compatible with any bonding agent enables you to use your preferred bonding agent
- Convenient delivery available in syringe and single dose delivery options

TempSpan™ Temporary Crown & Bridge Material

TempSpan Temporary C&B Material is a dual cure composite specifically formulated to produce highly esthetic and durable provisional restorations in the least amount of time possible. TempSpan Temporary C&B Material's unique dual-cure formula allows you to light cure the provisional both intraorally and extraorally, minimizing both chair time and patient discomfort.

Features & Benefits:

- · Outstanding physical properties ensures durable provisional restorations
- Dual cure formulation saves time and minimizes patient discomfort
- Wide range of shades seven shades ensure you never have to compromise esthetics
- · Convenient works with standard 50ml impression dispensing gun

TempSpan[™] Clear Matrix Material

TempSpan Clear Matrix Material is a clear pre-operative vinyl polysiloxane impression material that is ideal when creating templates for direct composite and provisional restorations. When used in conjunction with our clear impression trays the translucency of this material permits intra-oral polymerization of any light cure composite or TempSpan Dual Cure Temporary Crown & Bridge Material. With an oral set time of 2 minutes, TempSpan Clear Matrix Material is a significantly faster alternative to vacuum-formed splints, alginate, and hand-mixed putties.

N69AI

Features & Benefits:

• Clear vinyl polysiloxane formula – enables intra-oral polymerization minimizing chair time

100 - C&B Material Mixing Tips

- Time-saver working time of 1 minute and an oral set time of 2 minutes shorten provisional procedures
- Auto-mix delivery system eliminates messy, time-consuming hand mixing

TempSpan™ Transparent Temporary Cement

TempSpan Transparent Temporary Cement offers the perfect solution to conveniently cement your temporary restorations at a price that makes sense. Featuring eugenol-free resin chemistry, TempSpan Transparent Temporary Cement offers optimum bond strengths to prevent leakage and sensitivity, but can be easily removed when needed without damaging the preparation. Auto-mix syringe delivery provides hassle-free, precise placement directly into the restoration with minimal waste.

Features & Benefits:

- Transparent ideal for the highly esthetic anterior zone
- Ideal retention securely retains provisional restorations and facilitates easy removal
- Non-eugenol ensures compatibility with resin-based permanent cements

Zone™ - Non-Eugenol Temporary Cement

Zone is a zinc oxide non-eugenol temporary cement. Zone is available in the standard dentin color or in an A1 shade.

Features & Benefits:

Zone Automix Syringe (4g)

- Precise mixing of base and catalyst to maximize material characteristics
- Dispensed directly into any temporary
- Immediately Seated
- No mixing, no waiting, no hassle

Zone Dual Barrel Syringe (15g)

• Eliminates tubes and measuring

Zone Single Unit Dose (25 x 0.75g)

• Individual pouches for ultimate convenience

Zone Automix Syringe	Includes 1 - 4g Syringe, 8 Mixing Tips

Correct Plus $^{^{\text{\tiny TM}}}$ Fast Set Impression Material

Correct Plus Fast Set Impression Material is ideal when a faster-setting impression material is desired for 1-3 unit restorations. Correct Plus Fast Set exhibits outstanding tear strength and dimensional stability to help deliver remarkably detailed and precise impressions. See the Impression Material Comparison Chart on page 21 for a complete list of work and set times.

Features & Benefits:

- Fast work and set times With min work time of 45 seconds and a total set time of 2:30 minutes, it's ideal for 1-3 unit impressions
- High tear strength outstanding tear strength ensures reliable impressions
- Versatility three cartridge viscosities available (Light, Medium, Heavy)
- 4 50ml Cartridge Pack, Instructions, 16 Mixing Tips*
- 32 50ml Cartridge Bulk Pack, Instructions, 132 Mixing Tips*

B-Tron Parts

B-Tron Hydroprocessor, 110 Volt

Modular design with three interchangeable plug-in units which contain all of the electronic components, microcomputers and heating elements for easy, convenient servicing.

Separate display panels indicate the temperature of each bath, while function lights indicate Liquefying and Timing modes. There are also special displays to warn of power interruptions and when water levels become too low. The *B-Tron* is factory programmed with preset temperatures and is ready to use.

Dimensions (B-Tron 301):

- Width 16 1/4"
- Depth 10" (plus, allow 1 1/2" for power supply cord)
- Height 10 1/2" (lids closed), 16" (lids open)
- Weight 15 lb
- Electrical 120v 50-60 Hz, 10.4 amps

Also available in foreign operating voltages

B-Tron 301, 110v (60 Hz) DESCRIPTION REF/PART NO. B-Tron 301, 110v (60Hz) (3 bath unit: Boil/Auxiliary Store, Store and Temper) 15510

Tacky Stops

Disposable, self-adhesive, occlusal stops (1/16" x 3/8" x 1/16") which adhere to the occlusal surface of trays. Tacky Stops prevent over-seating of tray.

DESCRIPTION	REF/PART NO.
Box of 300	12051

Post Damming Plastic

Used to contain Reversible Hydrocolloid or any impression material in a maxillary tray and to increase compression for maximum displacement during seating of the tray. Tray must be clean and dry with no trace of glove powder for best adherence to the tray.

DESCRIPTION	REF/PART NO.
3/4 lb box (56 pre-cut strips, 3" x 1/2" x 1/8")	13061

Periphery Plastic

Designed to augment tray height. Also used along the periphery edge of trays for patient comfort or for a peripheral roll. Tray must be clean and dry with no trace of glove powder for best adherence to the tray.

DESCRIPTION	REF/PART NO.
3/4 lb box (49 pre-cut strips, 5" x 3/4" x 1/8")	13060

PrepWet

A lubricant which is sprayed over the entire arch after the retraction cord is removed. PrepWet allows the Reversible Hydrocolloid syringe material to flow freely throughout the sulcus, and easily remove the impression tray. PrepWet reduces tearing when sprayed on mouth, prior to seating the alginate impression.

DESCRIPTION	REF/PART NO.
PrepWet Kit (1 pkg. of 3, 4 oz sprayer bottles w/100 Dispenser Straws)	13097
Dispenser Straw (pkg. of 100)	13096

CEMENTS

Mojo[™] Veneer Cement

Mojo Veneer Cement is a light cure, esthetic cementation system that is designed for use with porcelain, ceramic, and composite veneer restorations. The simple, highly versatile selection of shades allows this material to be used with a wide range of veneer cases, while offering the least amount of shift available.* The corresponding water-soluble Try-In gels, included in the comprehensive kit, allow for a perfect match every time.

Features and Benefits

- Easy cleanup simply light cure for 1–2 seconds and remove excess cement
- Undetectable shade shift the restoration stays the same shade as on the first day you cured the cement
- Versatile shade options allows you to warm or brighten the restoration easily for a natural look;
 shades can be mixed for superlative shade customization
- Simple storage no refrigeration needed and easily stored at room temperature

CEMENTS

Breeze™ Self-Adhesive Resin Cement

Breeze Self-Adhesive Resin Cement is specifically designed to make the cementation of crowns, bridges, inlays, onlays and posts faster and easier by eliminating individual etching, priming, bonding, and mixing steps. Formulated with advanced resin technology, Breeze Self-Adhesive Resin Cement provides one of the strongest retention available in a self-adhesive cement with the quick and easy to use auto-mix delivery system. Upon application, Breeze Cement quickly goes to work to condition dentin, enamel, and the restoration all in one quick and simple step. By eliminating the etching, priming and bonding steps, both postoperative sensitivity and procedure time are drastically reduced improving peace of mind and freeing up precious chair time.

Features & Benefits:

- Exceptional bond strength adheres to dentin and enamel without a bonding agent
- Convenient auto-mix delivery system single-step accurate placement with minimal waste
- Versatile shade selection choose from A2, Translucent, and Opaceous White to satisfy all
 cosmetic needs
- Dual Cure light cure or self cure for maximum versatility

BONDING AGENTS

Bond-1[™] Primer/Adhesive

The Bond-1 Primer/Adhesive System is a 5th generation total-etch bonding agent that provides high bond strength in a convenient single-bottle application. The versatile system bonds both direct and indirect restorations. Bond-1 creates a sealed surface with an intricate network of polymerized primers and unfilled resin. This results in a high bond strength to dentin of up to 31.0 MPa and a film thickness of only 8μm. Its ease of application—combined with its low film thickness—provides the ideal surface to bond to all types of restorative materials.

Features & Benefits:

- Flexible bonds to all direct and indirect restorations
- Easy-to-use total-etch bonding technique that's familiar and proven
- Resilient bond strengths up to 31 MPa to dentin / 27 MPa to enamel

REF N01I Bond-1 Primer/Adhesive Kit

BONDING AGENTS

Bond-1™ SF Solvent-Free SE Adhesive

Bond 1-SF is a self-etch, one-coat bonding agent that is solvent-free — eliminating the need to air dry. This feature protects against sensitivity and prevents evaporation for stability and consistency. Bond-1 SF is designed for direct composite restorations and dual cure materials.* Bond-1 SF provides optimal bond strengths up to 30.4 MPa in just three basic steps: apply evenly, rub for 20 seconds, and light cure.

Features & Benefits:

- Solvent-free protects against sensitivity, eliminating common technique-sensitive issues such as under- and over-drying; also prevents evaporation
- No air drying saves you precious chair time; doesn't leave you guessing "how dry is too dry"
- Self-etch no need to acid etch; saves time and protects against sensitivity
- Versatile can be used in conjunction with light cure and dual cure materials*
- Unique handling properties enables an even spread of the material, ensuring complete coverage and optimal results
- One coat easy to use; reduces procedure time

RETURNED MERCHANDISE

Pentron will honor a 30-day money back guarantee on all products. Please contact your distributor for additional return policies and procedures.

PRODUCT PERFORMANCE COMPLAINTS

In the event of a suspected product performance complaint, contact your dealer or Pentron distributor for a return merchandise authorization (RMA). DEALERS NOTE: Pentron will not issue credit or product replacement unless all required complaint information is received.

LIMITED WARRANTY- LIMITATION OF PENTRON'S LIABILITY

Pentron's technical advice, whether verbal or in writing, is designed to assist dentists in using Pentron product. The dentist assumes all risk and liability for damages arising out of improper use of Pentron product. In the event of a defect in material or workmanship, Pentron's liability is limited, at Pentron's option, to replacement of the defective product or part thereof, or reimbursement of the actual cost of the defective product. In order to take advantage of this limited warranty, the defective product must be returned to Pentron. In no event shall Pentron be liable for any indirect, incidental, or consequential damages.
